### Research Methodology

For this research paper the data collected form secondary sources which are the various websites and research papers, books and other published and online published material like news, articles.

### Social Entrepreneur and Entrepreneurship

Bomstein (1998) A Social Entrepreneur is a path breaker with a powerful new idea who combines visionary and real world problem solving creativity, has a strong ethical fiber, and is totally possessed by his or her vision for change.

The social entrepreneur is the person or entrepreneurs who are basically undertake the social entrepreneurship. The social entrepreneur have all qualities of entrepreneurs jus have more factor in them that is motivation force toward bring the social change and find a solution for problems in a society.

These social Entrepreneurs are focusing on the social weak section and people in India many people living

---

under the BPL then the social entrepreneurship is relevant here and helpful to this weak section people. Social entrepreneurship involved a concerted effort to: (1) Systematically identify people with innovative ideas and practical models for achieving major societal impact; (2) Describe their function in society and shine a spotlight on their work; and (3) Develop support systems to help them achieve significant social impact.

The social Entrepreneurship is not the social work. The nonprofit enterprises are used hybrid social and commercial Entrepreneurship to achieve their self sufficiency. In short they run both social and commercial enterprises and the earned profit they used for adding in the social values.

Other social enterprises that run for profit making they are financially sound and make their own monetary and run commercial and social organizations simultaneously.

### **Social Enterprises in India**

In India the Social Entrepreneurship is growing in various sectors which are Agriculture and dairy, Communication and IT, Differently able, Education, Energy, Fabric and hand Crafts, Health Care, Affordable housing, Livelihood, Microfinance, Supply Chain, Appropriate Technology, Waste Management and Environment, Water and Sanitation.

Every enterprises required ecosystem to survive in the Market and in the completion. Nowadays social enterprises are creating their own ecosystem to survive and stand strongly in the society.

### **Conclusion**

Social entrepreneurship is a process by which entrepreneur or person build or transform institutions to advance solutions to social problems, such as poverty, illness, illiteracy, environmental destruction, human rights abuses and corruption, in order to make life better for many. In India still people living under the below poverty line and even they don't able to fulfill their daily basic needs this social enterprises helps to them their empowerment and fulfill their need and facilities in the cheap rate by providing skill development, help to get their right fight for them, get power energy at their home, give job opportunities to their kids by providing skill development courses, and also providing the health care facilities to these poor people.

The social entrepreneurship is really beneficial for these people and also for society which improve the living quality of life and growth of the society.
