### **Background and Importance of the Problem**

The evolution of local government organizations in Thailand has been developed for a long time in the present. Has stepped in to have important baht, whether in the care of the people's livelihoods of political organizations closest to the people until regarded as the local government it is a form of holding on to people in political participation. To apply to government at the national level. The Tambon Administrative Organization has the highest management, namely the President of the Tambon Administrative Organization. Which has the authority and responsibility for the formulation of policies, control and responsibility for the administration of the Tambon Administrative Authority to be in accordance with the rules, regulations, rules, policies and regulations. So that the work of the Tambon Administrative Organization It is all right based on people as the center and must be for the benefit of the people by good governance practices and taking into account the participation of the people. In the preparation of the Tambon Administrative Organization Development Plan Budgeting Purchasing, Auditing, Performance Evaluation Including disclosing information to the public it is therefore imperative to be a person who has reason, patience and courage to face events Take responsibility Judge Problems quickly, have a sense of generosity, creativity. Have extensive knowledge be honest, fair, and have good personality. A reliable person Have the principles of the heart And enthusiastic about working when any Tambon Administrative Organization There is a democratic model of the Tambon Administrative Organization. Act as a good manager Allow people to participate Taking into account the common interests rather than personal interests, it will make the public administration of the people more efficient and cost-effective (Chuwong Chayabutra: 1996: 87-88).

Chang Klang Subdistrict Administrative Organization Chang Klang District Nakhon Si Thammarat Province There is an election of the president of the Tambon Administrative Organization directly from the local people to represent the local administration. But at the same time define the characteristics of the executive The administrators are the leaders of the Tambon Administrative Organization, some people do not meet the needs of people Is that some people have a bad personality No responsibility There is no human relationship with the people. And lack of morality as a result, people do not have the confidence to the Chief Administrator of the SAO of the Tambon Administrative Organization.

Therefore, the researcher is interested in studying performance in accordance with good governance principles of the President of Chang Klang Subdistrict Administrative Organization Chang Klang District Nakhon Si Thammarat Province How people think about the president of the Tambon Administrative Organization in terms of transparency Responsibility Human relations and morality etc. of the Chief Administrator of the SAO to know the needs of the people Leading to a practice guideline And the development of the Tambon Administrative Organization in accordance with the opinions and needs of the people for the benefit of local and national development in the future.

### **Research objectives**

1. To study the performance of good governance of the Chief Administrator of Chang Klang Subdistrict Administrative Organization Chang Klang District Nakhon Si Thammarat Province
  2. **5. The results of the compilation of problems and recommendations for the performance of good governance of the Chief Administrator of Chang Klang Subdistrict Administrative Organization Chang Klang District Nakhon Si Thammarat province as follows**

Suggestions on the performance problems according to the good governance principles of the Chief Administrator of Chang Klang Subdistrict Administrative Organization Chang Klang District Nakhon Si Thammarat Province

- 1) The rule of law: supervisors Judge different problems in the agency lacking justice.
- 2) Moral principles include no activities to promote love and unity in the organization. There is no activity to praise those who do well. To be an example of another person.
- 3) The principle of transparency includes no activities to promote ethics for staff.
- 4) The principle of participation, namely the low level government officials, lack of participation in expressing opinions. Government officials are not a role model in creating operational consciousness.

5) The principle of responsibility include lack of consciousness in performing duties. Government officials still hold on to the traditional system of work.

6) The principle of value is the lack of materials and equipment to perform their duties.

**Suggestions on solutions to correct the performance in accordance with the good governance of the Chief Administrator of Chang Klang Subdistrict Administrative Organization Chang Klang District Nakhon Si Thammarat Province**

1) The rule of law: supervisors should judge the problems in the agency, lack of justice.

2) The principle of Moral, such as should, organizing activities to promote love and unity in the organization there should be activities to honor those who do well. To be an example of another person.

3) The principle of transparency is that there should be an ethical promotion activity for staff.

4) The principles of participation, namely, the minority police officers should take part in expressing opinions. Commissioned police officers should act as a role model in raising awareness of performance.

5) The principle of responsibility are the police officers should be aware of Performance of duties Police officials should also improve, develop, and learn new things.

6) The principle of value is that there should be adequate supplies and equipment to perform their duties.

**Discussion of research findings**

A research study entitled "Performance in accordance with good governance principles of the President of Chang Klang Subdistrict Administrative Organization. Chang Klang District Nakhon Si Thammarat Province "as follows

The results of the study analyzed the performance data according to the principles of good governance of the Chief Administrator t of Chang Klang Subdistrict Administrative Organization. Chang Klang District Nakhon Si Thammarat Province found that the overall value of interpretation was at a high level. In this regard, we can discuss that Thai society is a society where Buddhism is the way of life, philosophy of life of Thai people, culture, traditions and ethics are all inherited from Buddhist philosophy. Understand the views and patterns of how we behave To be applied in solving problems with the performance of duties Civil servants who are developed with physical, mental, and professional skills to be ethical, moral, and attitudes are right. Values that are just as good Inevitably can lead to self-development to have an awareness, ideology, and responsibility which is consistent with the research of Jinda Praikaew has studied the subject "The application of good governance to administer the Tambon Administrative Organization: a case study Mai Reang Sub-District Administrative Organization, Chawang District, Nakhon Si Thammarat Province was at moderate when considered individually, it was found that is at the moderate level as well in descending order: moral, responsibility Participation in the law of law, transparency, verifiable And the value for money respectively when considering each aspect, it was found that the actions were in descending order of mean as follows: Morality Responsibility Rule of law The principle of transparency Value and the principles of participation with the least mean.

**Rule of law** It was found that the overall value had a high level of interpretation. It could be discussed that because the government officials adhere to political science and jurisprudence for performance which is in line with Benchawan Wandesri's research studies on Governance of the President of the Sub-District Administrative Organization in Roi Et Province. The objectives of this study were to study the level of good governance and factors related to the governance of the president of the Tambon Administrative Organization, namely age, education level, Knowledge and understanding of roles and understanding of governance with good governance The results of the research were found that the President of the Sub-District Administrative Organization in Roi Et Province. There was a high level of overall governance. Efficiency In terms of moral responsibility, the rule of law has a high level of governance. As for transparency Participation There is a low level of governance. For other factors, which are the knowledge and understanding of roles and responsibilities of governance. The research results were found that there was a relationship with the governance of the president of sub-district administrative organization while age, education level there is no relationship with the governance of the president of the sub-district administrative organization in Roi Et Province.

**Moral** it was found that overall it was valuable and had a high level of interpretation. With honesty, adherence to the righteousness, on the basis of morality, ethics under the rules the statute of society and its benefits to society and the nation is consistent with the research code. Saeng Phong has studied the subject Local development administration process according to good governance principles of the Executive

Committee and members of the Tambon Administrative Authority Council. Chanthaburi To study the process of local development management according to the principles of good governance and to compare the local development administration process according to the principles of good governance by gender, age, marital status, education level. Occupation and income of executive directors and members of the Tambon Administrative Organization. The research results were found that 1.Executive Director and Member of the Tambon Administrative Authority Council Chanthaburi There is a local development process according to the principles of good governance at a high level. The process of local development according to morality was the most average followed by a local development process based on the cost-effectiveness principles. For the lowest average is the process of local development according to the principles of responsibility 2.Executive committee members and members of the Tambon Administrative Organization Council Chanthaburi province with different sex, age, marital status, education level, occupation, income, and local development administration process were significantly different.

**The principle of transparency** it was found that the overall value had a high level of interpretation. It could be discussed that because the government officials created mutual trust of the organization to be transparent. Can be verified, in line with Noppol's research Suranakkharin Researched on Application of good governance principles in sub-district administrative organizations According to the views of the people of Chiang Mai The objectives of this study were to study people's perceptions towards applying good governance principles to the Tambon Administrative Organization and to study the relationship between the size of the Tambon Administrative Organization and the knowledge and understanding of the Tambon Administrative Organization. And participation in the operations of the Tambon Administrative Organization the results of the research showed that the application of good governance in the sub-district administrative organization. According to the views of the people of Chiang Mai, the overall picture is positive. When comparing personal factors, it was found that people with different sexes, ages and education levels had no different views on the application of good governance in the Tambon Administrative Organization. But people with different incomes there were different views on the application of good governance in the Tambon Administrative Organization. And when compared according to the size factor of SAO and participation in the implementation of the SAO, it was found that the people had different views on applying the principles of good governance to the Tambon Administrative Organization. As for the cognitive factors in the SAO, it was found that people had no different views on the application of good governance in the Tambon Administrative Organization. The size factor of the SAO did not correlate with the cognitive factor in the SAO.

**Principles of participation** it was found that the overall value had a high level of interpreting results. Participate in expressing opinions, making decisions, as well as supporting, monitoring and monitoring their own actions. The decision was made in line with the research of Phakdee Srimuang, studying the principles of good governance to administer the Tambon Administrative Organization: a case study. Na Sai Subdistrict Administrative Organization, Muang District, Nakhon Si Thammarat Province. To study the application of good governance to administer the sub-district administrative organization of people in Na Sai Sub-district, Mueang District, and Nakhon Si Thammarat Province With different levels of education and careers the results of this study were found that People have an idea of good governance. To manage the sub-district at a moderate level when considered individually, it was found that at the moderate level as well, in descending order, namely the rule of law. Moral Principles of participation Responsibility Value And the main aspect, transparency, check respectively.

**Responsibility** it was found that the overall value had a high level of interpretation. It could be discussed that because the government officials were determined and determined to perform their work with the utmost ability to achieve success in accordance with the government's rules / regulations or related. Operate with consciousness on duties, society, people and country Taking into account the benefits of service recipients And the general public, which is consistent with the research of Maneerat Yodsri, has studied the application of good governance principles in the performance of duties of sub-district administrative organization personnel, Chana District, Songkhla Province. The principles of good governance are applied in the performance of duties of Sub-District Administrative Organization personnel, Chana District, Songkhla Province, and to know the recommendations of Tambon Administrative Organization personnel affecting the application of good governance principles in the practice of Management of sub-district administrative organization personnel, Chana District, Songkhla

Province. Female personnel apply the principles of good governance to their duties. At a high level, especially the rule of law and the principle of responsibility, the age between 31-40 years can be considered as a group that applies the principles of good governance to the performance of their duties at a high level. A bachelor's degree or a postgraduate degree has a high level of governance and monthly income. Personnel with income 10,000 baht or more has the most applied principles of good governance in performing their duties. Suggestion section regarding the rule of law, the SAO allows people to express their opinions and make complaints about various matters. Moral Allowing executives and employees to create more morals and ethics to the people. The main aspect of transparency the management and employees should act responsibly with the awareness of the service burden. Principles of participation Let the SAO coordinate with people groups and various organizations to participate in activities that are beneficial, people must have the right to express their opinions for the common good. Responsibility Development needs of the people for the benefit of better living and quality of life. And the main aspect to manage and manage to be efficient by paying the budget in a cost-effective manner, making the most of the development benefits.

**The principle of cost-effectiveness**, it was found that overall values were interpreted at a high level, which could be discussed because of the limited bureaucracy, management and use of natural resources. For the best interest of the public, in line with the research of the code. Saeng Phong has studied the subject Local development administration process according to good governance principles of the Executive Committee and members of the Tambon Administrative Authority Council. Chanthaburi to study the process of local development management according to the principles of good governance and to compare the local development administration process according to the principles of good governance by gender, age, marital status, education level. Occupation and income of the Executive Committee and members of the SAO. 1. Executive Director and Member of the Tambon Administrative Authority Council Chanthaburi There is a local development process according to the principles of good governance at a high level. The process of local development according to morality was the most average. Followed by a local development process based on the cost-effectiveness principles. For the lowest average is the process of local development according to the principles of responsibility. Chanthaburi province with different sex, age, marital status, education level, occupation, income, and local development administration process were significantly different.

### **Important suggestions**

#### **1. Policy recommendations**

A research study on the performance of good governance of the President of Chang Klang Sub-District Administration Chang Klang District Nakhon Si Thammarat Province as following.

Performance in accordance with good governance principles of the President of Chang Klang Subdistrict Administrative Organization Chang Klang District Nakhon Si Thammarat Province Overall, there is a high level of interpretation value. The researcher has suggestions. As follows, government officials should maintain this standard and promote the value principle. Principles of participation and transparency principles
